

USING SOCIAL MEDIA REASONABLY

Social media can be updated continuously be open to multiple users, allowing virtual sharing, etc. It shows itself as one of the most ideal channels in terms of. People can convey their feelings and thoughts about any subject on social media, discuss them and come up with new ideas. In addition to their personal information, they can share various photos, videos, and experience the real world in a virtual environments.

Those who use Social Media smartly;

- Will guide the business and social communication world of the future
- Will be able to manage the transition to the digital age.
- It will increase the business, career and life success of Social Media
- They will ensure their integration with other communication tools.
- Blogger and Social Mediator or why that they are not

Good Sides of Social Media

- ① Seeing what is happening in the world: Social media, young people can notice the changes happening in the world and in their country earlier.
- ② Communicating with friends faster: They can communicate with their groupmates more quickly on any topic
- ③ Having information about the lessons and the homework: Thanks to the school and class groups, it becomes easier for him to have information on any subject he misses at school.
- ④ Job opportunities: Some social networking sites offer job opportunities and options.
- ⑤ Easy access to information: Young people use social media as a means of reaching the information they seek more easily.

USING SOCIAL MEDIA REASONABLY

Nowadays the use of social media is increasing, but it is necessary to use it on a reasonable basis because it is addictive, it makes asocialization, it is a waste of time, stress, eye disorder, desire to be lonely, we prefer to use social media when we need to study, therefore it brings failures in the continuation of the book, while we used to smell the smell of books. Now we either read from technological devices through social media or we watch the movie, we believe in advertisements made unconsciously on social media and buy products that we do not need, which leads to unconscious consumption, we may encounter many things such as theft of our personal data on social media, do you think it's worth it. If we come to use it in a reasonable way, for example, we can make video conversations because we cannot visit our loved ones during the coronavirus period, we can be aware of what is happening in the world, it helps us do homework, we can call the information we want it allows us to reach this, and income can be obtained through social media. This is to use social media in a reasonable way.

Aleyna Yildiz

Using social media appropriately:

Internet is now an important part of our lives. We cannot live without the internet. The ease of accessing the information we want to people instantly has changed many things in our lives. Perhaps the internet has transformed our lifestyle, altered all of us. It is mentioned that there are more than 26 million internet users in our country. Internet and the social media it brings, blogs, instant messengers etc. All tools are now an indispensable element of our lives. With the internet and social media, everything in the world has become global it is not possible for us to close ourselves to this new order and to isolate it from this new order. What we need to do is to be aware of what we are doing and for what purpose we use the internet while being a part of this new order. Not forgetting real life while lingering in the virtual world.

BENEFITS OF TECHNOLOGY

It brought many new developments in the field of health. Thanks to advances in healthcare, vaccination and technology, slowed diseases. It caused you to use our renewable energy sources well. Nuclear power plants helped us protect. There have been many improvements in education. Easy access to information, easy transportation, mass production, offers modern and comfortable living spaces. Socializes all over the world. Ensures proper use of underground resources.

"LET'S NOT FORGET THAT THE CORRECT
USE OF TECHNOLOGY IS ALWAYS
BENEFICIAL!"

THE DANGERS OF TECHNOLOGY

Mental disorders are seen in children. There is a chance of being bullied and it affects Psychology badly. May encounter inappropriate things because of access to wrong information. It is not good for your limbs such as eyes and neck. Overuse leads to addiction. Due to overuse you can't control your emotions. Anger is the first of this. Damages friendship, shyness and social skills reveal, leads to sadness, rapid consumption of natural resources, damaging the environment, harms trees, cause global warming. Caused the culture to deteriorate.

"LET THE TECHNOLOGY NOT USE US,
LET US USE TECHNOLOGY"

USING SOCIAL MEDIA

Social media, which is a very effective communication tool both in business life and daily life, is now in our lives in every field. This has benefits as well as harms. So today I will inform you about reasonable use.

Since people use social media, bad people have increased. So it isn't good. I think social media is divided into two:

1) These people use it for good purposes;

These people know how to use social media. It is a person who uses it as a hobby, who wants to share his daily life with other people who want to make his voice heard. These are good things, this is exactly how social media should be used.

2) People who use it for bad purposes;

People in this category don't know how to use social media and overuse make themselves addicted. For example perfection makers, thieves... These people are on the rise because we don't use them reasonably. So social media should be used carefully and its purpose if we do so and social media will become a better and safer place.

Of course there are many people who do not use social media, as there are those who use social media reasonably. Who knows, maybe we're one of them. Social media often brings even the furthest away. But not everyone uses it for that. Maybe people don't even know what reasonable use means. What if we're one of them? People now use social media for bad things rather than good things. They open another account that's not in their name, and they use it for insults, harassment, and other things in an easy way.

How or why is this happening? There are social it's because the media is not being used reasonably. People are no longer looking for productive things on social media. The reason for this is that social media is not reasonably used.
